## SUPERVISOR'S REPORT

---

Whole number of Scholars in Town,	484
Amount of Money raised by Town,	\$2,000.00
“ received from State Treasury,	765.13
Total School Resources,	2,765.13

With few exceptions our schools have made great progress, and are in better condition than for years. This is largely due to the employment of tried teachers, and retaining their services for a year rather than for a term, as has been too often done in the past. If any have failed among our teachers to win success, one great cause will be found in a want of capacity for government.

Persons who cannot successfully govern and interest a small district school, should not be employed or expect employment as teachers. Agents will do well to give this matter more attention in future, and be assured, if possible, that teachers have the ability to *govern* as well as to instruct, before sending them to the Supervisor.

Another fault with teachers of small experience is lack of judgement in the economical use of their time in the school room. They could greatly improve themselves by making frequent visits to our best schools, reading educational journals, taking a partial or whole course of study at the Normal School, and in every available way seeking the best methods of doing school room work. The teacher of a mixed school will never be satisfied that he is doing profitable work, unless he avails himself of all the helps within his reach, and employs the best of them. When this is done he will rarely fail to so interest his pupils as to win success.

There is much however to be done that in no way belongs to the teacher. Efforts should be speedily made to reduce the number and increase the size of our schools, provide better school houses, and have all of them properly supplied with necessary apparatus. Even in a poor school room, a globe, outline maps, charts of various kinds, and a copy of Webster's Unabridged Dictionary, can be placed at moderate expense; and certainly no school in this age of progress should be without them. No teacher can possibly do without these invaluable helps what he can accomplish with them. Why should they not in some way be furnished?

What is there demanded at our hands of greater importance than the best moral and intellectual training of the children committed to our care? Let us by all the means in our power aid our teachers in the great work which we have assigned them, and we may soon witness a wonderful revival of interest in all that pertains to the greater efficiency of our common schools.

In short, let our schools be "so organized, equipped, instructed, directed, and supported as to give to every child in the largest measure and at the least cost, the fullest and best practicable preparation in knowledge and culture for life and citizenship."

Respectfully submitted,

D. O. MOULTON, *School Supervisor.*
